Dynamic professional with a diverse skill set encompassing both Data Engineering and Web Development. With a passion for harnessing the power of data, I excel in designing and implementing robust data pipelines while ensuring data accuracy and integrity. I thrive in collaborative environments, adeptly working in Agile teams to deliver innovative solutions.

WORK EXPERIENCE

Lear Corporate: *Data Engineer, Rabat, MAR*   **Sept. 2022 – Present**
- Optimized operational workflows by implementing strategic modifications to existing systems, effectively addressing emerging requirements and enhancing overall efficiency.
- Acted as a proficient Scrum Master for the Business Analytics Engineering Operation ART team within the SAFe framework, fostering collaboration and agile practices to achieve project success.

University Hospital Center Hassan 2: *Data Scientist Intern, Fez, MAR*   **Mar. 2022 – July 2022**
- Leveraged applied statistics and machine learning techniques to analyze Colo-rectal Cancer and Quality of Life datasets, uncovering valuable insights and understanding complex relationships.
- Collaborated closely with business teams to enhance their workflow by developing and implementing Multi-modal prediction models, resulting in a substantial improvement on adopted metrics.

MAGSolus: *Spring Boot/ Angular Web Developer Intern, Rabat, MAR*   **Aug. 2021– Aug. 2021**
- Developed and tested 3 modules of Library Management System REST APIs using Spring Boot, alongside implementing their corresponding initial front-end modules with Angular.

MAGSolus: *Laravel Web Developer Intern, Rabat, MAR*   **July 2020 – Aug. 2020**
- Created a 1-month free trial premium Invoice Management System using Laravel, providing users with an efficient and user-friendly platform to manage their invoices.
